STA-MULSE[®] GMS SEAS

*Chemical
Solutions for
your Process
Needs*

Product Description

STA-MULSE[®] GMS SEAS is a blend of nonionic emulsifiers which can be used in a wide variety of mildly acidic to mildly basic applications. STA-MULSE[®] GMS SEAS is a blend of glycerol monostearate and PEG-100 Stearate which can be used as the only emulsifier in a variety of oil-in-water emulsions.

Applications

STA-MULSE[®] GMS SEAS can be used either alone or in combination with other emulsifiers in a large variety of cosmetic and pharmaceutical creams and lotions, as well as, an emulsifier for a wide range of emollient oil into water. STA-MULSE[®] GMS SEAS is also a good opacifier because of its water dispersible characteristics.

Typical Physical Properties

Appearance @ 25° C	Off White Flake
Saponification Value:	90.0-100.0
Acid Value Maximum	1 max
Melting Point, Open Capillary	50.0-60.0
Color Gardner	3 Max
